What we offer:

We are able to offer training that can be delivered in your setting, to a group of interested staff and parents. All of our bespoke training is focused on enabling others to use technology to support special needs education. We can offer:

- Any of our centre-based courses can be delivered in your school or setting, as a package for your whole staff.
- Tailored workshops delivered in your school or setting, specifically designed for your requirements.
- Tailored workshops for specific software and hardware that you may not have available in school but you are considering buying and evaluating.

Courses available:

Please contact us to discuss any possible training needs. We are able to deliver bespoke packages. Courses that have been delivered in the past have included:

- Clicker 5
- Clicker 6
- WriteOnline
- Boardmaker
- Communicate: In Print
- Apps

The benefits of our bespoke training:

Not only will you help to grow and develop the skills of your workforce, but you will also be investing in your staffing team as a whole. We feel that training is a valuable way to give your staff the tools they need to better support the students in your setting. Bespoke training is a cost effective way of training a large group of people with mixed abilities at your convenience. Because we can tailor courses to suit your team's requirements, we can deliver a course that's right for you.

The courses are delivered by our multi disciplinary team of practising professionals who also support a case load of highly complex children and young people in Kent and Medway. The training we offer is delivered with consideration towards implementation in real situations and the approaches we adopt in our own work.

To find out more and to discuss your training needs, please contact us for more information.
