Using the Grid 3

Who is this course for?
This course will teach you technical skills at your own pace. A workshop format in the afternoon gives you time to practise adapting and making your own resources.

This course would be particularly useful for teachers, therapists or parents who are supporting a child or young person who is using an Alternative and Augmentative Communication system (AAC).

Delegates new to Grid 3 need to attend the whole day. For those who wish to refresh their knowledge and skills of using Grid 3, please join the afternoon workshop only which runs from 1pm.

What is it about?
The Grid 3 is a piece of software used to enable students to communicate with symbols and text. Students can use it to control a computer to use text, email and to play music and videos.

This one day course will explore a range of relevant features in this software. These are fun as well as being able to promote progression and develop students skills and communication levels. This software can be used for individuals or small groups of students with additional needs, so that they can join in with a wider range of curriculum activities and social opportunities.

What will I get out of this?
At the end of the course you will:

- Increase your confidence at using this software to make changes to a pre-made resource or package.
- Increase your awareness of the published online grids and paper based materials that can be used as additional resources.
- Improve your understanding of how to make resources that support learning and communication.
- Please bring a USB or Memory Stick with you on the day.

Costs:
Free to anyone supporting a child, young person or adult on the Kent and Medway CAT Caseload.

Dates and Times:
- Tuesday 16 October 2018
- Tuesday 15 January 2019
- Tuesday 26 March 2019
- Tuesday 11 June 2019
- 9:30 am to 3:30 pm
