Kent Early Years Stronger Practice Hub (KEYSPH)

The Stronger Practice Hub Programme (SPH) is part of the Department for Education's (DfE) Early Years COVID-19 Recovery package.

The Pandemic showed that those disadvantaged children living in deprived areas were most impacted. Fewer children have reached their expected levels of development than before the pandemic and research has shown the attainment gap between socially disadvantaged children and their peers has grown and will only increase as they progress into school.

The Stronger Practice Hub programme looks to support Early Years settings by:

- Universally building strong supportive networks of providers
- Helping to upskill the workforce through EEF programmes in targeted areas
- Developing webinars, blogs, vlogs and social media information that is useful to providers from within the EEF The Evidence Store.
