

# **MATHS HUB CONTRIBUTING IMPACT - OFSTED**

## Evidenced in reports for teaching for mastery schools

We are incredibly pleased to be able to share some of the impact evidenced in recent Ofsted reports regarding schools that have worked with the Kent and Medway Maths Hub, which praise the hard work and dedication of our partner school teachers; we are proud to be a small, yet integral part of their progress in mathematics.

The following quotes from the reports illustrate how subject leaders have worked alongside Mastery specialists and the wider Maths Hub team to develop mathematics in their schools.

“Mathematics curriculum is carefully planned and well established.” (Charing Church of England Primary School, 20 October 2021). This reminds “pupils of their previous learning and encourage pupils to remember and build on what they already know” (Hoath Primary School, 18 January 2022).

Pupils “develop their understanding of increasingly complex mathematical concepts” (Sandgate Primary School, 11 November 2021) and “can tackle more complex learning because of what they already know” (Miers Court Primary School, 2 November 2021).

One of the leaders from the school expressed how supported they felt being with the hub and how much knowledge they gained by being on this journey. It contributed significantly towards their performance in the Ofsted inspection.
